SUMMARY

Senior DevOps Engineer with **4+ years** of experience designing, securing, automating, and scaling infrastructure on **AWS** and **GCP**. Expert in **Kubernetes**, **Terraform**, **CI/CD**, **GitOps**, cloud security controls, secrets management, DR/backup strategy, infrastructure modernization, and cross-cloud platform migrations. Proven track record of delivering POCs to production, improving system reliability, reducing cloud costs, and accelerating developer productivity.

EXPERIENCE

Senior DevOps Engineer

JisrHR

September 2021 – Present, Saudi Arabia

- Led multi-cloud infrastructure delivery across **AWS** and **GCP**, including provisioning VPC, EKS, GKE, RDS, Cloud SQL, Secrets, Vault, and IAM using Terraform (modules, remote state, environments, and RBAC).
- Designed and Deployed **Kubernetes Access Script** Solution with Access Management and Screen Recording, all totally **Free**.
- Deployed and managed containerized applications at scale and implemented **container orchestration** using **Docker** and **Kubernetes**, Delivered **GitOps automation** via ArgoCD + Helm chart compliance, URL and host rewrite on ALB.
- Implemented **CI/CD** Pipelines using **GitHub Actions** and **Semaphore**, reducing manual deployment errors and decreasing overall deployment time.
- Proficient in **bash scripting**, **automated tasks**, and improved efficiency by developing scripts that reduced manual workload and decreased system downtime.
- Orchestrated the development and maintenance of Back-End microservices using **Ruby on Rails**, **Python** and Ensured the seamless integration of **PostgreSQL**, **MySQL**, and **Redis** databases within the DevOps culture.
- Worked cross-functionally with engineering teams to enforce **cloud security standards**, certificate management, secrets encryption, SSO/SAML/OAuth, WAF protection, and monitoring solutions using **Datadog**, **CloudWatch**, and **Rollbar**.

SKILLS

Cloud Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI).

Containerization and Orchestration: Kubernetes, Docker, Helm, ArgoCD, GitOps, CastAI.

Infrastructure as Code: Terraform, Terraform Cloud.

CI/CD: GitHub Action, Semaphore.

Scripting and Automation: Bash, Python, AWS Lambda, Jira Automation, Slack Workflow.

Monitoring, Observability, and Logging: Datadog, NewRelic, CloudWatch, Rollbar.

Version Control Systems: Git, GitHub.

Networking and Security: Firewalls, Load Balancers, SSL/TLS, SAML/SSO, OAuth.

DevOps Methodologies and Best Practices

Incident Response and Troubleshooting

Performance Optimization and Scalability

Linux/Unix Systems Administration

Languages: Arabic, English.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Cloud and TCP/IP Pre-Requisite Knowledge

Linux Professional Institute (LPI)

EDUCATION

Bachelor of Information Technology

Al-Rayan University • 2021 • 89% Degree
